- Can be kept even in your pocket

Special NEW inhaler features:

- Made in medical grade plastic
- Hygienic mouthpiece cap
- One-way silicone valve
- Patented nasal adaptor
- Small and ergonomic design
- Laboratory tested salt crystals

USE THE POWER OF NATURE FOR EASIER BREATHING!

Salt air inhalation was first recommended for healing respiratory ailments centuries ago, by Hippocrates, the father of modern medicine. Asthma, allergies and other respiratory ailments were treated by inhaling steam from boiling salt water, inhaling salt air seaside, and inhaling the salt micro-particles in underground caves/mines.

Presently, there is a growing recognition of the benefits of salt mine and halo-therapy for respiratory diseases outside of Europe, where its curative, natural drug-free and non-invasive properties have been known, studied and proved for centuries.
